SK Carrodain Liquid je ideálnym riešením pre sprchovacie priestory s **liatymi podlahami** alebo **mikrocementom**. Sprchový žlab Liquid bol vyvinutý v úzkej spolupráci so skúsenými špecialistami na tieto typy podlahových povrchov. Po dokončení zostáva viditeľný iba minimálny otvor roštu so šírkou 26 mm. Mimoriadne elegantné a úplne bezškárové riešenie. S vložným roštom širokým iba 20 mm je Carrodain Liquid zďaleka najužším sprchovým žlabom pre liate podlahy. Napriek tomu zostáva sifón jednoducho vyberateľný a ľahko sa čistí. Carrodain Liquid je dostupný vo verziách LOW aj PRO v 11 štandardných farbách. Vložku je navyše možné povrchovo upraviť rovnakým materiálom, aký je použitý na finálnu vrstvu podlahy.

FR Carrodain Liquid constitue la solution par excellence pour les douches à l'italienne parachevées avec des **sols coulés** ou en **microciment**. Ce caniveau de douche a été développé en étroite collaboration avec des spécialistes chevronnés de ces techniques de finition des sols. Une fois parachevé, seule une ouverture de grille minimale de 26mm reste visible. Bref, une solution super épurée et totalement sans raccords. Avec sa grille encastrable d'une largeur de 20mm, Carrodain Liquid constitue de loin le caniveau de douche le plus étroit pour les sols coulés. Toutefois, le siphon reste toujours simple à retirer et facile à nettoyer. Carrodain Liquid est disponible tant en version LOW qu'en version PRO dans les 12 couleurs standard. La grille encastrable pourra cependant aussi être colorée avec le même matériau que la couche finale de la finition de votre sol.

DE Die Carrodain Liquid ist DIE Lösung für Walk-in-Duschen, die einen Boden aus **Estrich** oder **Mikrozement** bekommen. Die Liquid-Duschrinne wurde in enger Zusammenarbeit mit erfahrenen Spezialisten für diese Fußbodentechniken entwickelt. Nach der Fertigstellung bleibt nur eine minimale Rostöffnung mit 26mm Breite sichtbar. Superschlicht und komplett nahtlos. Mit dem 20mm breiten Einlegerost ist die Carrodain Liquid bei Weitem die schmalste Duschrinne für Estrichböden. Dennoch lässt sich der Siphon jederzeit einfach herausnehmen und leicht reinigen. Die Carrodain Liquid ist in der LOW als auch in der PRO-Ausführung in 12 Standardfarben erhältlich. Der Einlegerost kann aber auch mit dem Material der Deckschicht Ihres Bodenbelags mitgefärbt werden.

EN Carrodain Liquid is the solution for walk-in showers finished with **cast floors** or **micro-cement**. The Liquid shower drain was developed in close cooperation with experienced specialists in these flooring techniques. After finishing, only a minimal grid opening of 26mm remains visible. Super sleek and completely seamless. With the 20mm-wide insert grating, Carrodain Liquid is by far the narrowest shower drain for cast floors. Yet the siphon always remains easily removable and easy to clean. Carrodain Liquid is available in both LOW and PRO versions in 12 standard colours. However, the insert can also be coloured with the same material as the final layer of your floor finish.

IT Carrodain Liquid è La Soluzione per le docce walk-in con pavimento in **resina a colata** o **micro-cemento**. La canalina Liquid è stata infatti sviluppata in stretta collaborazione con specialisti esperti in queste tecniche di finitura dei pavimenti. A lavoro finito rimane visibile soltanto un'apertura minima della griglia: 26mm. Estremamente elegante e priva di giunture. Con una griglia a incasso larga 20mm Carrodain Liquid è di gran lunga la canalina doccia più stretta per i pavimenti in resina a colata. E il sifone è comunque sempre facile da rimuovere e semplice da pulire. Carrodain Liquid è disponibile nelle versioni LOW e PRO in 12 colori di serie. La griglia a incasso può anche essere rifinita con lo stesso materiale e colore del vostro pavimento.

SK Rozhodli ste sa pre mikrocement, epoxidovú alebo PU podlahu? V takom prípade môžete vložný rošt sprchového žlabu **Liquid White** povrchovo upraviť rovnakým materiálom, aký tvorí finálnu vrstvu vašej podlahy. Vďaka tomu sprchový žľab dokonale splynie so zvyškom podlahy v sprchovacom priestore.

FR Vous comptez opter pour un revêtement de sol en microciment, en époxy ou en PU? Vous pourrez alors colorer la grille du **Liquid White** dans la couleur de votre finition du sol. Votre caniveau ne fera ainsi plus qu'un avec le reste du sol de la douche.

DE Haben Sie sich für Mikrozement, Epoxid oder einen PU-Boden entschieden? Dann können Sie den Einlegerost der **Liquid White** in der Farbe Ihre Bodenbelags mitfärben. So wird Ihre Duschrinne ganz eins mit dem übrigen Duschboden.

EN Are you opting for microcement, epoxy or a PU floor? Then you can colour the insert grid of the **Liquid White** shower drain in the colour of your floor finish. In this way, your shower drain becomes one with the rest of the shower floor.

IT Avete scelto un pavimento in microcemento, resina epossidica o poliuretano? Allora potrete dare alla griglia a incasso della canalina **Liquid White** lo stesso colore del rivestimento per pavimenti da voi scelto. Così la canalina doccia formerà un tutt'uno con il resto del pavimento della doccia.

nový patentovaný *ľahko vyberateľný* sifón

nový systém sifónu Jednoduché čistenie

SK Nový sifón Carrodain je vybavený patentovaným zdvíhacím systémom. Rukoväte na oboch koncoch vytvárajú pákový efekt, vďaka ktorému sa sifón jednoducho vysunie zo sprchového žlabu. Jednoduché, bezpečné a bez potreby použitia náradia!

FR Le nouveau siphon Carrodain a été équipé d'un système de soulèvement breveté. Les leviers aux deux extrémités créent un effet levier, faisant ainsi ressortir le siphon du caniveau de douche en le poussant vers le haut. Une solution facile, sûre et sans le moindre outil!

DE Der neue Carrodain-Siphon verfügt über ein patentiertes Hebeseystem. Die Griffe an beiden Enden erzeugen einen Hebeleffekt und drücken den Siphon damit aus der Duschrinne nach oben. Einfach, sicher und ohne Werkzeug!

EN The new Carrodain siphon has a patented elevator system. The handles at both ends create a leverage effect, pushing the siphon up out of the shower drain. Easy, safe and no tools required!

IT Il nuovo sifone di Carrodain è dotato di un nuovo sistema brevettato di estrazione. Le alette alle due estremità fanno da leva e permettono di spingere con facilità il sifone verso l'alto, fuori dalla canalina. Facile, sicuro e senza bisogno di attrezzi!

LOW

30 mm výška vodnej uzávery

SK Carrodain LOW má 30 mm vodnú uzáveru, prietokovú kapacitu 31 litrov za minútu a vďaka svojej mimoriadne nízkej montážnej výške je ideálnym riešením pre rekonštrukcie.
